Where the most popular answer accounted for 50.1% or more of the total answers, that answer is highlighted. Where no answer accounted for 50.1% or more of the total answers, the highest two (or, in one case, four) answers are highlighted. These questions may be especially suitable for review and protest. **(IMPORTANT NOTE: The union only received 5 answer sheets for the Sunday SAT exam session. This analysis is based on those five answer sheets. Because of the small number of submissions, we do not know if this analysis is statistically valid.)**
